Angela and Dennis,

It appears that we have a conflict, see below. May be we should push it for 4/16/12? Please advise.

Denise and I need to verify the sampling results being available. End of the week is ok with me thus far. No one else has replied yet. Let me know what times you are available for each date and I'll coordinate the others.

Thanks,

Arlene
Elena and I will be in Puerto Rico the week of Arpil 9th, the second week of April. We could participate in a conference call on Thursday 4/12, anytime and Wednesday 4/11, but we would need to get back to you with a time, since we are trying to schedule another meeting.

Thanks

▼ Arlene Anderson---03/23/2012 08:40:06 AM---To all: We finished phase 2 sampling and the analysis should be QA/QC within the next weeks. Denise

Subject: Cabo Rojo GW Contamination Site

To all:

We finished phase 2 sampling and the analysis should be QA/QC within the next weeks. Denise has a venue for the PAS (the neighbor library) for a tentative week of April 23.

The Head start has decided to move and are arranging funding for this action. They gave us addresses of other Head starts that they run in Cabo Rojo- so far, it appears none are located in our 4 sources areas. Denise will verify this fact.

We need a conference call after Jill finishes phase 1 health assessment and we can start discussing the health risk message. Of course, if phase 2 is available at the same time then let's discuss a comprehensive health risk approach. Denise and I were thinking the second week of April for this call, please provide your availability to me. I will coordinate the conference call.

Thank you in advance,

Arlene
